

# Exhibit B

## Telephone Conversation from 01/30/01

Where are you located?

We are in Bloomfield Hills the Detroit area.

We are expecting Jesse Hefter he is the President...[Portion Redacted]

Hi good morning. (Jesse)...[Portion Redacted]

The attachment Anna can also be just a wireless networking capability in another words the hand held device be it a phone or a small hand held compact eye pack or something like that would in the near future have something like a blue tooth radio that allows us to speak to a blue tooth and enables a computer on your desk and essentially just having it within 5 or 6 feet of each other allows you a network connection and allows the recorded conversation to be smoothly moved from the hand held device to the say the larger source device to your computer for example.

[Portion Redacted]...you could record the conversation that we are having in English but lets say someone needs to hear it in Spanish that is your language of choice they should be able to call up the conversation and have it played to them in another language.

[Portion Redacted]...allow on the fly translation to or at least a background translation to say French and a text speech system that simplifies it to French and plays it back to you in a different language. ...[Portion Redacted]
